

TCX Monitored Maintenance

What is TCX Monitored Maintenance?

TCX Monitored Maintenance is a comprehensive monitoring program that includes all preventative maintenance items such as oil and filter changes. This program includes a warranty on your compressors to provide you with peace of mind on uptime performance. Each compressed air system is monitored remotely, providing service alerts, alarms, and other common alerts. TCX and your team will have access to remote monitoring for real-time alerts and data acquisition.

Package Benefits

Monitoring & Rapid Response

24/7 asset monitoring provides our engineers with diagnostic information on the health and performance of your air system to detect problems and provide rapid response.

Preventative Maintenance

TCX alerts you to any issue or impending service requirement. This helps you maintain energy efficiency of your air system by getting service when needed.

Risk Mitigation

TCX provides a warranty on your air end while your air compressor system is under the care of TCX.

All Brands

TCX can be used with all compressor brands and other air room equipment such as dryers and filters, optimizing your entire air system.

No Surprises

A fixed annual subscription to TCX covers all spare parts, consumables and engineering support your air system may need.
